Summary

Versatile Full-Stack Developer specializing in the MERN stack. Skilled in building scalable APIs, dynamic frontend applications, and robust backend systems. Focused on creating efficient, maintainable, and user-friendly web applications.

Skills

Languages JavaScript, Python, TypeScript
Front-end React, HTML5, CSS3, NextJS
Back-end Node.js, Express.js, Flask, Next.js
Database MongoDB, MySQL, PostgreSQL
Cloud Firebase, AWS, Google Cloud
AI LLMs, OpenAI API, Gemini API, MCP
Testing Selenium, Postman
Version Control Git, GitHub, GitLab
Soft Skills Team Collaboration, Problem-Solving, Communication

Education

Masai School Mar 2025 – Oct 2025
Full-Stack Web Development Program (MERN Stack)

Govind Ballabh Pant Institute of Engineering and Technology 2020 – 2024
Bachelor of Technology in Computer Science and Engineering (CSE)
CGPA: 8.0

Projects

TypeSprint – Real-Time Typing Speed Test Platform Jul 2026
Live — GitHub
- Developed a real-time typing speed test platform using React, NestJS, and PostgreSQL.
- Implemented JWT authentication, typing accuracy/WPM calculation, and live leaderboard functionality.
- Built REST APIs and optimized database operations for fast performance and a seamless user experience.

CanvaX AI – AI-Powered Visual Design Platform Jun 2026
Live — GitHub
- Built an AI-powered canvas using React, NestJS, Gemini, and LangChain for natural-language diagram generation.
- Implemented real-time multiplayer collaboration with Socket.IO and Redis for canvas sync and cursor tracking.
- Secured the app with JWT, Google & GitHub OAuth, RBAC, and a PostgreSQL + Prisma ORM backend.

ATSify – AI-Powered ATS Resume Analyzer Jun 2026
Live — Frontend GitHub — Backend GitHub
- Built an AI-powered ATS Resume Analyzer to evaluate resumes against job descriptions.
- Implemented resume parsing, keyword extraction, skill matching, and ATS scoring.
- Generated ATS scores, skill-gap analysis, and resume improvement recommendations.

Experience

MediaNV Feb 2026 – May 2026
Software Engineer
- **Backend Development**
  - Built scalable backend APIs using NestJS and PostgreSQL.
  - Developed business logic for review dashboards, analytics, and VoIP modules.
  - Collaborated with frontend and QA teams to deliver production-ready features.
- **Database & System Optimization**
  - Optimized PostgreSQL queries and data aggregation workflows to improve API performance.
  - Managed data access using TypeORM and PostgreSQL.
  - Contributed to migration from microservices to a monolithic architecture and deployment workflows.

Bharat Electronics Limited Jun 2024 – Aug 2024
Data Analytics Intern
- **Data Analysis, Visualization and Reporting**
  - Analyzed datasets exceeding 500,000 records with 100
  - Developed Power BI dashboards and Python-based visualizations, reducing reporting time by 40
- **Process Optimization and Automation**
  - Streamlined workflows and automated data extraction processes, improving operational efficiency by 20
  - Automated reporting tasks, reducing manual effort and saving 10 hours per week.
